## DIY ADVANCED MODEL RAILROAD SIGNALING ELECTRONICS: SENSORS, INTERACTIVITY, TRACK CONTROL (PAPERBACK)

Createspace, United States, 2015. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Four years in preparation, this book shows the model railroader how to design an automatic signaling and block control system that avoids the usual compromises. It properly responds to single or multiple trains of any length, including stops and reversals, while remembering proper status during system power-down. All types of signals are covered, from simple red/green to 3-color units with approach mode ; and with or without self-latching or built-in aspect (red/amber/green) hierarchies. Road-crossing signal operation is properly asymmetrical in response to train direction, and adapts to stopping/reversing. The text encompasses AC and DC powered signals and trains of all gauges, including toy ( high-rail ) layouts, and includes both common cathode and common anode configurations for DC powered setups. To ensure realism, any substantive dependence on timers is avoided. A wide variety of homebrew and commercial train-sensors is covered, with instructions on DIY alternatives ranging from very simple to ultimate performance. Based on the use of the excellent scale signals that are on the market, the text applies to any combination of DIY and commercial sensor and control hardware. Multiple-block signaling with turnouts, tumble-down, and cross-tracks are discussed in detail. The use of the same sensors for automatic track (train or cab ) control is described for turnaround loops and wyes, for the prevention of following- and opposing-train collisions, and for non-derailing at improperly positioned turnouts. Also covered is the application of these concepts in a Digital Command Control context. DIY Advanced Model Railroad Signaling Electronics assumes a very modest knowledge of electronics, or alternatively, the ability to interpret a schematic diagram and solder simple, highly economical components on a hobbyist s circuit board. Specific electronic board...
