Not illustrated. 1872 Excerpt: .signs of decline, and in which no violations of the theory here laid down are committed, will never have in it any drones or drone-comb, will never attempt to raise a queen, and consequently never cast a swarm. The wax-workers will supply all the comb needed for brood and honey, the maximum of strength will be kept up, and the only reasonable limit to the amount of surplus honey will be the amount of the supply in the flowers. The periods here given as governing the different operations are necessarily variable, as they depend on circumstances not named, but are about the average, in a normal colony, during the honey-harvest. We have reports of the Italian bee reaching its imago state in eighteen days, and in other instances it is lengthened to twenty-four; but, as we conceive, these fall under the head of irregularities, and indicate...
