Reviews

Comprehensive guideline for ebook fans. I have read and i am certain that i am going to going to go through yet again yet again down the road. You wont truly feel monotony at whenever you want of your own time (that's what catalogs are for concerning when you check with me).
(Keegan Abernathy)

AGE-ASSOCIATED NEUROLOGICAL DISEASES

Book Condition: New. Publisher/Verlag: Springer, Wien | This volume covers selected up-dated contributions from the Conference on Age-associated Neurological Diseases held in Vienna 1989. Fields covered include Age-associated Memory Impairment (AAMI) Alzheimer's and Parkinson's diseases and dementias and movement disorders of other etiologies. Concerning dementia, some papers deal with diagnosis employing neuro-imaging methods - PET, SPECT, MRI and XCT, others by means of electro-physiological methods. An important aspect is the early preclinical diagnosis of dementia using neuro-psychological tests to enhance the chance of effective treatment. Finally, drugs now under clinical investigation are discussed and preliminary results for several compounds are presented. This volume with its up-to-date contributions will be of special interest to all physicians treating elderly persons with age-associated degenerative diseases. The papers compiled in this supplementum are a selection of the best contributions presented at the 19 Central-European Neurological Symposium (CNS 19) held on June 29 - July 1, 1989 in Vienna. The main topic of this conference was degenerative and age-associated neurological diseases. In recent decades life expectancy has dramatically increased, at least in the industrialized countries. This has led to extreme distortions of the so-called population pyramids that no longer look like such but begin to almost resemble cylinders. As a consequence of this "overaging" of the population, diseases that are associated with age have become much more common than before. It was thus more than reasonable to devote a congress of the CNS series to these important neurological diseases. The following fields of interest are covered: Age-associated memory impairment (AAMI), Alzheimer's and other dementias, Parkinson's disease and other movement disorders, stroke and others. Concerning the dementias, some papers deal with diagnosis employing neuro-imaging methods such as MRI, CT, PET and SPECT, others using electrophysiological methods. An important aspect in the early...
