EXPLOSION SEISMOLOGY IN CENTRAL EUROPE

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | Data and Results | Publication of the Deutsche Geophysikalische Gesellschaft | The determination of crustal structure by means of explosion seismology has been one of the major objectives of the European Seismological Commission (ESC) over the past twenty-five years. It was decided some time ago to publish the results of regional crustal investigations in Europe in a series of monographs. This publication entitled "Explosion Seismology in Central Europe - Data and Results" is Volume 1 in a sequence of publications dealing with the crustal structure in Europe. The European seismologists are indebted to the German Geophysical Society (Deutsche Geophysikalische Gesellschaft) for taking the initiative to publish this book. Thanks are due to the German Research Society (Deutsche Forschungsgemeinschaft) for providing generous financial support of the field measurements and data evaluation. It is hoped that this publication will stimulate a continuation of investigations of the earth's lithosphere in order to elucidate the details which are still not fully understood. | 1 Main Geologic Features of the Federal Republic of Germany.- 2 Contributions by Other Geophysical Methods.- 2.1 Investigation of Seismic Noise in the Federal Republic of Germany.- 2.2 Magnetism.- 2.3 Geoelectric Ultra-Deep Sounding.- 2.4 Geothermic Investigations.- 2.5 Compressional and Shear Wave Velocities as a Function of Temperature in Rocks at High Pressure.- 2.6 Some Petrophysical Aspects of Deep Structure.- 2.7 Gravity.- 3 Basic Data of the Deep-Seismic Sounding Observations.- 3.1 Shotpoint Data of Quarry Blasts 1958-1972.- 3.2 Seismic Signals from Quarry Blasts.- 3.3 Description of Profiles.- 3.4 Presentation of Record Sections.- 3.5 Standard Equipment for Deep-Seismic Sounding.- 3.6 Seismic Long-Distance Observations of Quarry Blasts Test Measurements in Western Germany.- 3.7 Cooperation in Deep-Seismic Sounding between the Geophysical Institutes, the Geological Surveys, and the Oil Industry.- 4 Problems...
