

Advanced Chemical Methods for Soil and Clay Minerals Research Proceedings of the NATO Advanced Study Institute held at the University of Illinois, . 4, 1979 Nato Science Series C Volume 63

By -

Springer. Paperback. Book Condition: New. Paperback. 492 pages. Dimensions: 9.2in. x 6.1in. x 1.1in. During the past few years there has been a marked increase in the use of advanced chemical methods in studies of soil and clay mineral systems, but only a relatively small number of soil and clay scientists have become intimately associated and acquainted with these new techniques. Perhaps the most important obstacles to technology transfer in this area are: 1) many soil and clay chemists have had insufficient opportunities to explore in depth the working principles of more recent spectroscopic developments, and therefore are unable to exploit the vast wealth of information that is available through the application of such advanced technology to soil chemical research; and 2) the necessary equipment generally is unavailable unless collaborative projects are undertaken with chemists and physicists who already have the instruments. The objective of the NATO Advanced Study Institute held at the University of Illinois from July 23 to August 4, 1979, was to partially alleviate these obstacles. This volume, which is an extensively edited and reviewed version of the proceedings of that Advanced Study Institute, is an essential aspect of that purpose. Herein are summarized the...
